

Open Access Policy

International Journal of Applied and Experimental Biology (IJAEb)

ISSN Print: 2790-6523; ISSN Online: 2790-6531

1. Aims and objectives

The International Journal of Applied and Experimental Biology (IJAEb) is an Open Access journal. It is operational to make scientific research widely accessible, i.e., anyone can download, copy, print, read, share or distribute without paying. As an open access journal, IJAEb helps researchers, scholars, students, and the general public access the knowledge easily. This Open Access policy is designed to align with the indexing requirements of the Directory of Open Access Journals (DOAJ) and promote the sharing and advancement of knowledge.

2. Licensing

IJAEb applies the Creative Commons Attribution License 4.0 (CC BY 4.0) to all published articles, as mandated by the DOAJ for inclusion in its directory. Under the CC BY license 4.0, readers and users of IJAEb's content are granted the following rights:

- a. The freedom to share: Users can copy and redistribute the material in any medium or format.
- b. The freedom to adapt: Users can remix, transform, and build upon the material for any purpose, even commercially.

By publishing in IJAEb, authors agree to let IJAEb to publish their work under the terms of the CC BY 4.0 license. This license ensures that the article is available to the public while giving proper credit to the authors.

Note: The first two volumes of the International Journal of Applied and Experimental Biology were published under the terms of the Creative Commons Attribution-Non-Commercial 4.0 International License (CC BY-NC 4.0). From January, 2024, IJAEb will be published under CC Attribution 4.0 (CC BY 4.0)

3. Author Retention of Copyright

Authors retain the copyright of their published articles in IJAEb. This means that authors have the right to use, reproduce, distribute, and display their work. Authors can give permissions to others to do the same. IJAEb respects and supports the intellectual property rights of authors. The journal also acknowledges their ownership of the published content.

4. Article Processing Charges (APCs)

To support the Open Access model and cover the publication costs, IJAEb may require authors to pay Article Processing Charges (APCs) upon acceptance of their manuscripts starting from **1st January 2024**. However, the APCs, when applicable, will be clearly communicated to authors during the submission and review process. In addition, IJAEb strives to keep its APCs reasonable and offers fee waivers or discounts for authors from low-income countries or those facing financial difficulties. This ensures that everyone has equal opportunities to publish their work.

5. Archiving and Preservation

IJAaEB understands the importance of long-term archiving and preservation of scholarly content. All published articles are stored in digital repositories or databases to ensure they are accessible in the future. IJAaEB also encourages authors to self-archive their articles in institutional repositories or other appropriate platforms to enhance the visibility and reach of their research.

6. Review of Open Access Policy

IJAaEB periodically reviews its Open Access policy to be updated or revised to align with emerging trends, best practices, and the requirements of indexing bodies such as DOAJ. Any changes to the Open Access policy will be communicated transparently and promptly to authors, readers, and stakeholders.

7. Contact Information

For any question regarding the Open Access policy of the International Journal of Applied and Experimental Biology (IJAaEB), please contact:
